The Network Infrastructure Technician certification provides a foundation of knowledge in networking. The training in this program will prepare you to install, configure, and operate Local Area Networks, (LANs), Wide Area Networks (WANs), and Dial Access Services for smaller networks. You will be able to use communication protocols such as IP, Apple Talk, Ethernet, and Access Lists. This program also prepares you for the Cisco Certified Network Associate (CCNA) certification tests respected in the I.T. industry.
